High efficiency warm air furnace

End use objective: heating

The high efficiency warm air furnace offers an Annual Fuel Utilization Efficiency (AFUE) greater than the minimum market standard. The unit features superior heat exchange as well as recovery of excess heat from the water produced by combustion.

EFFICIENCY

Authorized minimum efficiency: 78%

Minimum efficiency for Gaz Métro Programs: 90%

FINANCIAL INCENTIVE

Capacity	Financial incentive
0 to 225 000 Btu/hr	\$600

To take advantage of this amount, the client must sign a standard contract (> 75 000 m³) with their sales representative or conclude a simplified contract (≤ 75 000 m³) with a Gaz Métro certified contractor (Gaz Métro Authorized Partner Program).

This financial incentive is in addition to any financial contribution under the CSP/RCSP and may also apply to current customers. The total incentive amount must not exceed eligible expenses. Amounts are subject to change without prior notice.

To consult the eligible equipment for this program we invite you to look at the Internet link of Energy Star:
